

Anmol Sansi

Full Stack Software Engineer | Backend, Cloud & Applied AI Systems
San Francisco | (312) 468-3428 | Open to relocate | [LinkedIn](#) | [Website](#) | asansi0896@gmail.com

SUMMARY

Full Stack and AI Software Engineer with 5+ years of experience building and owning cloud-native, production-grade systems across fintech, analytics, and AI-driven products. Proven track record of delivering scalable APIs, real-time data pipelines, and LLM-powered applications that improve performance, reduce costs, and drive measurable business outcomes, experienced in end-to-end ownership from system design and data modeling to deployment, observability, and incident response in high-availability environments.

SKILLS

Language: Python, Java, Typescript/ JavaScript

Frontend: React, Redux

Backend: Node.js, FastAPI, Django, Flask, Spring Boot, REST APIs

Data: SQL, MySQL, PostgreSQL, NoSQL, MongoDB

Cloud/ Devops: Amazon Web Services (AWS), Docker, Kubernetes, Microservices

AI: OpenAI, RAG, AI Workflows

WORK EXPERIENCE

AI Full Stack Software Engineer II - AI.Rawat (San Francisco, USA) Aug 2024 - Present

- Built a real-time sales analytics platform aggregating data from 5 e-commerce platforms into a unified dashboard, showing sales trends and inventory needs. Cut stock-out risks by 25% and improved inventory turnover by 15%.
- Developed AI-driven workflows in Moodle LMS, adding RAG chatbot for admin-teacher-student collaboration and automated performance reporting. Improved academic outcomes by 20% and feedback quality by 30%.
- Owned backend development lifecycle from requirements to deployment in a fast-paced environment, while mentoring 3 junior engineers and improved reliability of distributed systems and delivered production-ready APIs.

Full Stack Software Engineer - Alphadroid (Los Angeles, USA) May 2025 – Nov 2025

- Owned design and delivery of multilingual, voice-assisted platform using React and Python to streamline patient registration and hotel operations, reducing intake time by 30%, increasing form completion rates by 40%, and enhancing accessibility for diverse users.
- Architected and deployed AI hotel agent with React, Node.js / OpenAI, to handle daily guest interactions in natural language, supporting 5+ languages and accents. Enhanced React performance and responsiveness, improving page load times by 25%.
- Designed scalable, secure APIs using TypeScript and implemented data storage using PostgreSQL and MongoDB for structured, real-time updates and integrated OpenAI Multi-Function Calling to automate complex backend workflows.

Software Engineer - S&P Global (New Delhi, India) Jul 2019 - Dec 2022

- Migrated Financial Data (Pricing) platform to the cloud in a 20+ engineer team, participating in on-call rotations and resolving production incidents to maintain 99.9% uptime.
- Accelerated development end-to-end and debugging using Java, Test Driven Development (TDD) principles and unit testing, aligning with business values and requirements, and integrating new features, resulting in a 50% performance boost.
- Designed and maintained Python and Java-based backend systems and 100+ RESTful APIs to manage financial data records (10M+ records), enabling improved data integrity in high-volume market environments. Boosted revenue and reduced maintenance costs by 40%.
- Engineered ETL pipelines using Python, AWS Lambda, and Kinesis to process 1M+ financial records daily. Optimized for cost (-15%) and reliability, ensuring accurate data feeds for enterprise analytics and reporting. Integrated SQS for async event-driven processing and contributed across the full SDLC.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY 2024
Masters in Information Technology and Management

DELHI TECHNOLOGICAL UNIVERSITY 2019
Bachelors of Technology, Engineering
